Summary

Senior Frontend/UI Developer with 10+ years of experience building responsive websites and web application interfaces. Strong in **HTML5**, **CSS3**, **JavaScript**, design-to-code implementation, and reusable UI components. Experienced with React-based applications, REST API integration, cross-browser compatibility, code reviews, and mentoring junior developers.

Skills

- **Core frontend:** HTML5, CSS3, JavaScript (ES6+), responsive design, cross-browser compatibility
 - **UI engineering:** Figma-to-code implementation, reusable components, Flexbox, CSS Grid, accessibility (WCAG)
 - **Frameworks & styling:** React.js, Angular.js, TypeScript, Tailwind CSS, SCSS, BEM, Bootstrap
 - **Application development:** REST APIs, React Hooks, Redux, React Query, Context API
 - **Tools & collaboration:** Git, GitHub/GitLab, Vite, Webpack, Agile/Scrum, Figma
-

Experience

Sr. Frontend Developer

Techmate Technologies LLC • Lahore, Pakistan

05/2018 - Present

- Developed and maintained React-based web applications using JavaScript and TypeScript, delivering frontend features and ongoing improvements.
- Created reusable UI components and implemented responsive interfaces across desktop and mobile layouts.
- Integrated REST APIs and asynchronous data handling into frontend application features.
- Collaborated with designers, backend engineers, and stakeholders to implement product requirements.
- Participated in code reviews, resolved UI defects, and contributed to frontend maintainability and performance.
- Mentored junior developers on React development practices and frontend code quality.

Frontend Developer

Conovo Technologies • Lahore, Pakistan

08/2016 - 03/2018

- Built responsive web interfaces using HTML, CSS, and JavaScript.
 - Translated design mockups into functional interfaces and interactive UI elements.
 - Integrated frontend functionality with REST APIs and collaborated with UX colleagues to improve interfaces.
-

Projects

Rehza — Multi-product web and mobile platform (rehza.com)

- Owned frontend development of a React website, React builder dashboard, and Ionic Angular app for homeowners and builders.
- Implemented white-label branding across the dashboard and mobile app; integrated APIs into selected modules with backend developers.

Chefpost — Personal chef booking platform (chefpost.com)

- Built the complete Next.js frontend from Figma designs, including responsive customer-facing interfaces.

TTB — Web and mobile platform (ttb.org)

- Developed the frontend for a Laravel/Bootstrap management dashboard, Ionic Angular mobile app, and Ionic PWA website.
 - Implemented white-label branding for the app and PWA, with frontend controls for centralized management through the dashboard.
-
